Agrarian Promote Sustainable Crop Solutions essential to a safer and healthier life for people every where

Our products portfolio includes agro inputs like Novel Organic Products, Speciality fertilizers, Foliar Fertilizers, Water Soluble Fertilizers, Micro nutrients, Bio Stimulants, Soli Conditioners, Biopesticides & Natural Growth Promoters.

Our products are imported & manufactured under stringent quality controls supervisions to ensure purity and efficacy with sustainability.

We have collaboration with research base manufacturers those are having high strength in R & D to address all sections of the agricultural community for providing high quality agro inputs and scientific farm management solutions

VISION

- Agrarian is committed to Promote agro inputs those are having clear advantage in terms of efficacy, safety and sustainability
- To provide Integrated Agriculture Solution & scientific Farm Management Solutions, which ensures purity and reliability of farmers
- To provide solutions for maximizing farmers return on investment by enabling stonger and healthier crops/ plants
- To deal Products those are are effective, non poisonous, eco friendly, cost effective and that leaves less or zero residue through state-of-the-art technology

MISSION

- Agrarian established with mission to Go With Nature and committed to reach every farmers to promote and distribute high quality agro inputs including biopesticides, bio-fertilizers, natural growth promoters and natural fertilizers for a safe and healthy society.
- Agrarian will stand with farmers to help them produce quality seeds year after after by using novel biopesticides, bio-fertilizers and hybrid seeds.
- The effort of Agrarian will continue to keep our soil sustainable fertile for generations of farmers and improve yields which essential to a safer and healthier life for people every where

CORE COMPETENCIES

- Customer Focus
- Change Adoption
- Agility & Efficiency
- Responsibility

CORE VALUES

- Safety and health
- Environmental Safety
- Sustainability
- Protecting Planet

Biological Solutions

Formulation: Granular

Available Packing: 25 Kg

BIO NPK

Bio-NPK is a high-performance natural fertilizer that naturally unlocks 'trapped' soil nutrients. Its specialized bacterial blend fixes nitrogen and mobilizes phosphorus and potash, delivering essential macro and micro-nutrients for maximum crop yield.

Benefits: Enhanced availability of N, P & K, Increased micro-nutrients access, Reduced fertilizer cost, Optimized stress & soil health, Improved root architecture.

Application Window

First: During field preparation or before planting/sowing.

Second: During the vegetative growth/tillering stage of the crop.

Dosage: 25 kg/acre, Broadcast.

Crops: Suitable for all crops.

ESENCIAL

Esencial is a high-potency, carrier-based biological fertilizer designed to unlock the full potential of soil. By combining nitrogen fixing, phosphate solubilizing, and potash mobilizing bacteria into one synergistic formula, it provides a complete biological solution for crop nutrition. It transforms the soil into a self-sustaining nutrient factory by fixing atmospheric nitrogen, while solubilizing and mobilizing phosphorus and potash.

Benefits: Improves soil pH and soil health, Enhanced availability of N, P & K, Increased micro-nutrients access, Minimized fertilizer cost, Optimized crop resilience.

Application Window: First: During field preparation or before planting/sowing.

Second: During the vegetative growth/tillering stage of the crop.

Dosage : 4 kg/acre, Broadcast.

Crops : Suitable for all crops.

Formulation: Granular

Available Packing: 4 Kg

Formulation: Powder

Available Packing: 1 kg

KALA HIRA

A powerful soil conditioner that significantly improves nutrient and water retention in the soil, stimulates root development, and enhances plant immunity against environmental stress. It's powered by biological activated humic acid enhanced with carbon technology.

Benefits: Enhanced Nutrient and Water Uptake, Optimized Soil Health (Increased Organic Carbon/Water Retention), Accelerated Root Growth and Seedling Establishment, Improved Plant Resilience (Drought and Stress).

Application Window

First: During field preparation or before planting/sowing.

Second: During the vegetative growth/tillering stage of the crop.

Dosage: 2-3 kg/acre, broadcast. 1-2 kg/acre, drip/drenching.

Crops: Suitable for all crops.

Biological Solutions

Formulation: Granular

Available Packing:
1 kg & 4 kg

MAXIMIZER

A highly effective biofertilizer that actively solubilizes unavailable potassium in the soil, ensuring its constant and sufficient availability for key plant functions like water regulation, nutrient transport, and quality development.

Benefits: Enhanced Nutrient Uptake (Potassium), Improved Plant Resilience, Increased Flowering and Fruiting, Optimized Soil Health.

Application Window

First: During field preparation or before planting/sowing.

Second: During the reproductive stage of the crop.

Dosage: 4 kg/acre, Broadcast, Apply mixed with 25-30 kg of soil or fertilizers

Crops: Suitable for all crops.

MycorrhizaTM Biological Soil Amendment

Potent, long-lasting mycorrhizal biofertilizer dramatically increases P, water, and Zn uptake. It enriches soil with glomalin, leading to stronger plants and higher yields.

Benefits: Improved plant resilience, Enhanced nutrient and water uptake, Optimized soil health, Accelerated seedling establishment.

Application Window

First: During field preparation or before planting/sowing.

Second: During the vegetative growth/tillering stage of the crop.

Dosage: Soil application- 200 gm/acre, broadcast, apply with soil/ fertilizers or drenching., Seed treatment- 20 gm/ kg of seeds.

Recommended Crops: Cereals, Pulses, Oil seeds, Fruits, Vegetables, Plantation, Fiber crops. Forest and Nursery etc

Formulation: Granular

Available Packing:
Granular – 1 Kg & 4 kg
Powder – 200 gm

SEALICIA

Formulation: Granular

Available Packing: 4 kg

Sealicia is a high-performance metabolic catalyst engineered from premium brown seaweed, *Sargassum tenerrimum* and potent botanicals. Using advanced extraction technology, it delivers a precise blend of micronutrients, alginic acid, natural hormones, and enzymes to optimize plant health.

Benefits: Maximized vegetative growth, Enhanced flowering and fruit set, Improved resistance to environmental stress, Higher quality and quantity of produce.

Application Window

First: At the time of field preparation.

Second: After 35-50 days of sowing/ transplanting.

Dosage: 4 kg/acre, Broadcast.

Crops: Suitable for all crops.

Biological Solutions

Formulation: Granular

Available Packing: 1 kg & 3 kg

SULPHORN

Sulphorn is an advance, double engine biofertilizer engineered with specialized sulphur-oxidizing and iron-solubilizing bacteria. The microbial formulation significantly enhances the bioavailability and uptake of Sulphur and Iron throughout the crop cycle. It optimizes metabolic efficiency, improves oil synthesis, and ensures deep, vibrant plant coloration for superior crop performance.

Benefits: Enhanced sulphur and iron uptake, Optimized photosynthesis and plant colour, Increased oil and protein content in produce, Improved less fertile soil.

Application Window: **First:** At the time of field preparation or planting.
Second: After 35-50 days of sowing/ transplanting.

Dosage: 3 kg/acre, Broadcast, Apply with 25-30 kg soil/ sand/ compost.

Recommended crops: Sulphom improves the availability of Sulphur and Iron in soil and is suitable for all types of crops. Wheat, Paddy, Maize, Cumin, cotton, peanut, Tomato, Potato, Citrus, Banana, Papaya, Okra, Tea, Coffee, Black pepper, Pomegranate, Cereals, Pulses, Oilseeds, Fruits, Vegetables, Plantation, Fiber crops, Forest and Nursery etc.

ZINKARA

Zinkara is a cutting-edge biofertilizer that features high-concentration zinc solubilizing bacteria to convert unavailable soil zinc into a form readily utilized by plants. It prevents zinc deficiency symptoms, activates 150 plus enzymes and supports crucial metabolic functions for superior crop performance.

Benefits: Enhanced zinc uptake and availability, Improved plant metabolism and hormone synthesis, Accelerated seedling establishment, Increased final yield and crop quality.

Application Window

First: During field preparation or before planting/sowing.

Second: After 40-50 days of sowing/ tillering stage of the crop

Dosage: 4kg/acre, Broadcast, Apply with 25-30 kg soil/ compost/ sand.

Recommended crops: Zinkara is suitable for all crop such as Wheat. Paddy, Maize, Cumin, cotton, peanut, Tomato, Potato, Citrus, Banana, Papaya. Okra. Tea, Coffee, Black pepper, Pomegranate, Cereals, Pulses, Oil seeds, Fruits, Vegetables, Plantation, Fiber crops, Forest and Nursery etc.

Formulation: Granular

**Available Packing:
1 kg & 4 kg**

Chemical Solutions

**Formulation:
Granular Ball**

Available Packing: 2 kg

CALDIOM

Caldiom provides elite-level calcium nutrition through a concentrated formula that allows for higher input availability. Beyond mere nutrition, Calcium serves as a critical messenger within the plant, coordinating responses to stress and optimizing how nutrients are absorbed.

Benefits: Advanced cell wall support, Regulatory master, Enhanced nutrient uptake, Superior harvest strength, High concentration formula

Application Window

First: Early growth phase to prevent structural weaknesses.

Second: Peak reproductive or fruit development stage to maximize quality.

Dosage: 2.5-4 kg/ acre, Broadcast.

Recommended Crops: Agrarian Caldiom is suitable for all crops such as Cereals, Sugarcane, Pulses, Oil seeds, Fruit, Vegetables, Plantation, Flower crops, Fiber crops, Tuber crops, Spices crops, Forest and Nursery etc.

Chemical Solutions

Formulation:
Granular Ball

Available Packing: 2 kg

DHAMAAL

A premium granular soil conditioner, powered by a balanced matrix of organic matter and essential minerals. It is engineered to structurally improve the soil, enhance water and nutrient use efficiency, and provide a stable, nutrient-rich environment for robust plant development.

Benefits: Optimized soil health and structure, Increased water retention capacity, Improved nutrient use efficiency, Stronger root development.

Application Window

First: At the time of field preparation or before planting.

Second: After 40-60 days of sowing/ transplanting.

Dosage: 2-4 kg /acre

Crops: Paddy, Cotton, Chilly, Sugarcane, Banana, Fruit crops, and vegetable crops.

FILAMENT

Filament is an advanced, concentrated liquid formula of biologically fermented zyme and micronutrients. It works at the cellular level to enhance plant energy, metabolism, and nutrient assimilation, guaranteeing superior crop performance during all critical growth stages.

Benefits: Enhanced plant metabolism, Promotes vigorous vegetative growth, Maximized flowering and fruiting, Increased crop yield and quality.

Application Window

First: At the time of field preparation/ early vegetative stage.

Second: Before the initiation of the flowering/ fruiting stage.

Dosage: 5 kg /acre, Broadcast.

Crops: Rice, Wheat, Cotton, Potato, Cumin, Vegetables, Groundnut, Sugarcane, etc.

Formulation: Granular

Available Packing:
5 Kg & 10 Kg

FILAMENT GOLD™

Formulation: Granular

Available Packing:
1 kg & 4 kg

Filament gold is a scientifically formulated granule combining the power of fulvic acid, humic acid, and a rich profile of natural bio-stimulants such as seaweeds, vitamins, amino acids and botanicals. It transforms nutrient efficiency and plant vigour from the root zone up.

Benefits: Comprehensive soil health improvement, Enhanced nutrient and water use efficiency, Stronger root system and seedling vigour, Superior crop metabolism and yield.

Application Window

First: At the time of field preparation/ early vegetative stage.

Second: Before the initiation of the flowering/ fruiting stage.

Dosage: 4 kg/ acre, Broadcast.

Recommended Crops: Wheat, Paddy, Maize, Cumin, Cotton, Peanut, Tomato, Potato, Citrus, Banana, Papaya, Okra, Tea, Coffee, Black Pepper, Pomegranate, Cereals, Pulses, Oil seeds, Fruits, Vegetables, Plantation, Fiber crops, Forest and Nursery etc.

Biological Solutions

BLOOMING

Blooming delivers the essential organic potassium required for the most critical stages of a plant's life. By utilizing the natural potency of red algae, it provides a highly bio-available form of potash that traditional mineral fertilizers cannot match.

Benefits: Enhanced flowering, Superior fruit quality, Improve stress resilience, Improved shelf life, Efficient nutrient loading.

Application Window

First: At the flower bud initiation stage.

Second: During the fruit setting or grain filling stage.

Dosage: 2-3ml/L, foliar spray for fruits & vegetables | 1-2 ml/L, foliar spray for flowers & ornamental crops | 1-1.5 L/acre, for drip irrigation/ fertigation.

Crops: Suitable for all crops

Formulation: Liquid

Available Packing:
100 ML & 250 ML

Formulation: Liquid

Available Packing: 100 ML,
250 ML, 500 ML & 1 Ltr

BRIX™ AC 24

Brix AC 24 is the essential organic choice for farmers looking to maximize their crop's genetic potential. By delivering a full profile of amino acids, it bypasses the energy-intensive process of protein production, allowing the plant to focus on growth and yield.

Benefits: Rapid stress recovery, Enhanced photosynthesis, Improved nutrient uptake, Increased yield quality.

Application Window

First: At the time of early vegetative stage to build a strong canopy.

Second: During the pre-flowering or fruit-set or grain filling stage.

Dosage: 2-3ml/ L for fruits & vegetables | 1.5-2.5ml/ L for flowers & ornamental crops | 1.5-2.5 L/acre for drip irrigation/fertigation.

Crops: Suitable for all crops

Biological Solutions

Formulation: Granular

Available Packing: 100 Gm, 250 Gm, 500 Gm & 1 Kg

Flourra™ Biological Soil Amendment

Flourra delivers unparalleled stimulation for both the soil and the plant, ensuring rapid growth and superior vigour. It contains the natural power of plant extracts, beneficial bacteria, and humic acid. It is the natural choice for farmers seeking to improve soil fertility while maximizing their crop's genetic potential.

Benefits: Triple-action growth power, Superior root environment, Enhanced plant vigour, Soil health restoration, Boosts nutrient availability.

Application Window

First: At the time of field preparation or early vegetative stage.

Second: During the reproductive stage/ environmental stresses.

Dosage: 1 kg/acre, Broadcast, Apply with 25-30 kg soil/ compost/sand | 100 gm/acre, Foliar spray | 1 kg/acre, Drip irrigation.

Recommended Crops: Vegetables, Fruits, Field Crops, Ornamentals, Nurseries, Home Garden, Horticulture crop

NUTROCARE

The **Essential** organic bio-stimulant, combining the natural power of seaweed, fulvic acid, and humic acid with the biological strength of *Neurospora crassa*. Nutrocare delivers unparalleled stimulation for both roots and shoots, ensuring rapid growth and superior plant vigour.

Benefits: Multi-action growth, Soil & plant synergy, Rapid establishment, Nutritional efficiency, Enhanced stress tolerance.

Application Window

At every 2 weeks from early to mid-flowering and fruit setting.

Dosage: 2ml/L, Foliar spray | 500ml/acre, Drench to root zone 250ml/acre, Drip irrigation, Repeat after of 30 days of first application.

Recommended Crops: All Vegetables like tomato, capsicum, brinjal, cabbage, okra, onion, cauliflower, carrot, potato, chilli, cucumber, green gram, bottle guard etc.; Fruit crops like mango, sapota, pomegranate, papaya, grapes, apple, guava, citrus etc., cereals, pulses, oil seeds and Ornamental crops.

Formulation: Liquid

Available Packing: 100 ML, 250 ML, 500 ML & 1 Ltr

SEASTAR™

Formulation: Liquid

Available Packing: 100 ML, 250 ML, 500 ML & 1 Ltr

Seastar is a potent, all-natural bio-stimulant derived from *Ascophyllum nodosum*. Dramatically increases plant growth, flower set, and stress tolerance. It enriches the plant's metabolic activity, leading to stronger, healthier plants and higher yields.

Benefits: Boosts growth and yield, Improved plant resilience, Enhanced photosynthesis, Optimized crop quality, Rapid seedling establishment.

Application Window

First: During the initial vegetative growth phase/early tillering stage.

Second: Before flowering/panicle initiation/ reproductive stage.

Dosage: 600ml/acre, Foliar spray.

Recommended Crops: Vegetables, Fruits, Field Crops, Ornamentals, Nurseries, Home Garden, Horticulture crop.

Chemical Solutions

Formulation: Powder

Available Packing:
400 Gm

Hummid™

Hummid is a premium soil conditioner featuring 98% water-soluble humic acid derived from high-quality Leonardite. Rapidly dissolves to boost nutrient uptake, stimulate massive root growth, and optimize soil structure. It's the ultimate partner for improving fertilizer efficiency and crop stress resistance, leading to stronger, healthier plants and premium yields.

Benefits: Enhanced nutrient availability, Superior Root Development, Increased fertilizer efficiency, Improved water retention, Optimised soil health.

Application Window

First: At the time of early vegetative stage/ shortly after transplanting.

Second: During the late vegetative growth phase/early fruiting stage.

Dosage: 400gm/acre, Broadcast/ Drip irrigation, 2-3 times at 20-30 days of interval. 0.3-0.5 gm/L, Foliar spray, 2-3 times at 20-30 days of interval.

Recommended Crops: Vegetables, Fruits, Field Crops, Ornamentals, Nurseries, Home Garden, Horticulture crop.

ShootRoot

ShootRoot is an all-natural bio-stimulant powered by a synergistic blend of Kelp and Yucca extracts. Rich in naturally derived Kinetin and Auxin, it simultaneously drives root expansion and vegetative vigour to ensure rapid, balanced plant establishment.

Benefits: Root and shoot improvement, Rapid seedling establishment, Enhanced plant vigour, High organic quality, Improves stress tolerance.

Application Window

First: During soaking of cuttings, or immediately after transplanting/sowing.

Second: At the time of early vegetative/ tillering phase/ to maximize branching.

Dosage: 250ml/acre, Drip irrigation/ Drenching.

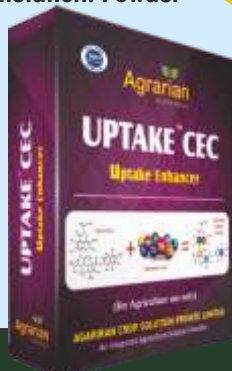

Recommended Crops: ShootRoot is Suitable for all crops such as cereals, Pulses, Oil seeds, Fruit, Vegetables, Plantation, Fiber crops, Medicinal Crops, Forest and Nursery etc.

Formulation: Liquid

Available Packing:
250 ml & 500 ml

Formulation: Powder

Available Packing:
250 Gm & 500 Gm

UPTAKE™ CEC

Uptake™ CEC is a Potent, fast-acting Fulvic Acid formula dramatically increases CEC and optimizes the uptake of macro and micronutrients. It improves nutrient mobility and plant metabolism, leading to stronger, more resilient plants and consistently higher yields.

Benefits: Enhanced cation exchange capacity (CEC), Superior nutrient translocation and uptake, Improved plant metabolism and vigour, Accelerated root and shoot development, Increased yield and quality.

Application Window

First: At the time of field preparation or during early vegetative stages.

Second: During the peak vegetative growth and pre-flowering stage.

Dosage: 100-400gm/acre, Broadcast/ Drip irrigation | 0.75-1gm/L, Foliar application.

Recommended Crops:

Vegetables, Fruits, Field Crops, Ornamentals, Nurseries. Home Garden, Horticulture crop.

Chemical Solutions

Formulation: Liquid

Available Packing:
50 MI, 100 MI & 250 MI

WAXY™ DC

Waxy DC is a premium, non-ionic adjuvant formulated to maximize the effectiveness of every chemical and nutrient spray apply to crops. It radically lowers the surface tension of water, transforming spray droplets into a thin, uniform film that coats the entire plant surface.

Benefits: Spreading power, Rain fastness, Uptake efficiency, Compatibility, Dosage rate

Application Window

Always incorporate WAXY DC into your tank mix for all foliar/ drip applications.

Dosage: 5 ml/15 L of water (or 0.3 - 0.5 ml/ L of water).

Recommended Crops: Rose, Field Crops, Ornamentals, Home gardens, Nurseries & Vegetables

Plant Fertility

Biological Solutions

Nutricell™ Biological Soil Amendment

Nutricell is a powerful, all-natural bio-stimulant blend, featuring a liquid formulation of nitrogen-fixing, phosphate-solubilizing, and potash-mobilizing microorganisms. This synergistic combination works to stimulate both root development and vegetative growth simultaneously by unlocking the full nutritional potential of your soil.

Benefits: Triple-action growth, Natural nitrogen supply, Phosphorus & potassium availability, Rapid establishment, Enhanced nutrient transport, Improves stress tolerance

Application Window: First: At the time of field preparation or after transplanting/sowing.
Second: During the early vegetative or tillering or grain filling stage.

Dosage: Soil application: 1L/acre, Mix with 200 kg of FYM/compost & broadcast.
Foliar/Drip application- 1L/ acre, Repeat 2-3 times at monthly intervals for best results.
Seed treatment- Mix 50 ml of Nutricell with 250 ml of water & dip 1 kg seeds for 20 minutes.

Recommended Crops: All Vegetables like tomato, capsicum, brinjal, cabbage, okra, onion, cauliflower, carrot, potato, chilli, cucumber, green gram, bottle guard etc.;
Fruit crops like mango, sapota, pomegranate, papaya, grapes, apple, guava, citrus etc., cereals, pulses, oil seeds and Ornamental crops

Formulation: Liquid

Available Packing: 100 MI, 250 MI, 500 MI & 1 Ltr

Chemical Solutions

Formulation: Liquid

Available Packing:
250 MI & 500 MI

CACOLIQ

Cacoliq provides elite protection by maintaining cell walls and membranes, contributing to the plant's overall structure. Its highly concentrated formulation ensures that higher calcium levels are available to the plant to significantly increase yield and quality.

Benefits: Structural integrity, Metabolic regulator, Eco-safe choice, Systemic action

Application Window

First: During the early vegetative stage to build plant structure.

Second: During the pre-flowering or fruit-setting stage.

Dosage: 20ml / 15 L of water, Foliar application.

Recommended Crops: Agrarian® Cacoliq is suitable for all crops such as Cereals, Pulses, Oil seeds, Fruit, Vegetables, Plantation, Flower crops, Fiber crops, Tuber crops, Spices crops, Forest and Nursery etc.

Chemical Solutions

Formulation: Liquid

Available Packing:
100 ML & 250 ML

CALBOM

Calbom provides elite structural support through its unique combination of Calcium, Boron, Manganese, and Zinc. It doesn't just help plants grow; it helps them grow stronger and produce better.

Benefits: Epidermis shield, Sugar transport pro, Visual excellence, Yield stability

Application Window

First: Early vegetative growth stage to build stem thickness.

Second: Pre-flowering to fruit development stage to improve fruit set and colour.

Dosage: Foliar Application- 250ml/ acre

Drip Irrigation- 500ml/acre

Recommended Crops: Calbom is suitable for all crops such as cereals, Pulses, Oil seeds, Fruit, Vegetables, Plantation and Fiber crops etc.

CRYSTAL

Crystal provides elite protection against nutrient deficiencies through a broad spectrum of micronutrients. Its unique concentration of Zinc, Boron, Ferrous, Manganese, and Copper penetrates the plant to drive vigorous growth and significantly increase yield.

Benefits: Total metabolic support, Vigour & vitality, Advanced formula, Eco-safe choice

Application Window

First: Early vegetative growth stage.

Second: Pre-flowering stage to maximize potential.

Dosage: Foliar Application- 2 kg/ acre

Drip Irrigation- 2 kg/acre

Crops: Suitable for all crops.

Formulation:
Crystal Particle

Available Packing: 1 Kg

Formulation: Powder

Available Packing:
250 Gm, 500 Gm & 1 Kg

FOLIARFERT™ - FLUX Boron 20%

Foliarfert provides elite protection against physiological disorders like fruit cracking and poor seed setting. Its advanced formulation ensures immediate absorption and systemic action, making it the scientific choice for sustainable and high-yield farming.

Benefits: Quality guard, Sugar translocator, Stress resilience, Advanced formula

Application Window

First: During the early vegetative growth stage.

Second: During the pre-flowering or fruit-set stage.

Dosage

Soil Application: 1.5-2 kg/ acre, Broadcast.

Foliar Application: 1-1.5 gm/ L of water

Crops: Suitable for all crops.

Chemical Solutions

Formulation: Powder

Available Packing:
100 Gm, 250 Gm & 500 Gm

FOLIARFERT™ - FLUX Zn 12%

Flux zinc is a premium, imported Zn-EDTA chelated micronutrient designed to maximize crop yields by correcting zinc deficiencies. Unlike conventional products, Flux zinc is powered by special chelating agents that ensure rapid absorption even in difficult soil conditions.

Benefits: Efficiency lead, Systemic action, Soil versatility, Yield & vitality

Application Window

Pre-flowering & post-flowering stage for maximum potential.

Dosage

Soil Application: 1-2 kg/ acre, Broadcast.

Foliar Application: 0.5-1.0 gm/ L of water.

Crops: Suitable for all crops.

NORTURE

Norture provides elite protection against multi-nutrient deficiencies with a broad spectrum of essential minerals. Its unique concentration penetrates the plant to drive vigorous growth and significantly increase flower retention and yield.

Benefits: Comprehensive nutrition, Yield maximizer, Vigour & vitality, Eco-safe choice, Advanced formula

Application Window

First: During the early vegetative growth stage.

Second: During the pre-flowering stage

Dosage: 250gm/acre, Foliar Application.

Crops: Suitable for all crops.

Formulation: Powder

Available Packing: 125 Gm

Formulation: Liquid

Available Packing:
250 ML & 500 ML

NUTRIMAX

Nutrimax provides elite nutrition through a broad spectrum of Macro and Micro nutrients. Its unique liquid concentration penetrates the plant to drive vigorous growth and significantly increase flower retention and yield. It is the scientific choice for sustainable and high-quality farming.

Benefits: Total nutrition, Yield maximizer, Vigour & vitality, Advanced formula

Application Window

First: At the early vegetative growth stage to ensure robust structural development.

Second: During the pre-flowering stage to maximize reproductive potential and fruit set.

Dosage: Foliar Application: 2ml/ L of water.

Drip Application: 1 L/ ac

Crops: Suitable for all crops

Chemical Solutions

Formulation: Liquid

Available Packing:
250 MI & 500 MI

NUTRIRICH

A **Nutririch** provides elite protection against nutrient deficiencies through its unique liquid concentration of NPK and secondary minerals. It penetrates the plant to drive vigorous growth and significantly increase harvest quality.

Benefits: Photosynthesis enhancer, Yield & quality maximizer, Comprehensive formula, Eco-safe choice

Application Window

First: During the early vegetative growth stage to build root biomass and plant strength.

Second: During the post-bloom or physiological maturity stage to maximize fruit quality.

Dosage: Foliar Application: 2ml/ L of water.

Recommended Crops: Agrarian Nutririch is suitable for all crops such as Cereals, Pulses, Oil seeds, Fruit, Vegetables, Plantation, Flower crops, Fiber crops, Tuber crops, Spices crops, Forest and Nursery etc.

SIXXEER

Sixxer provides elite protection against micronutrient deficiencies. Its unique chelated concentration penetrates the plant to drive vigorous growth and significantly increase flower retention and yield. It is the natural choice for farmers seeking both protection and productivity in one bottle.

Benefits: Completely Chelated, Efficiency Lead, Vigour & Vitality, Eco-Safe Choice

Application Window

First: At the onset of nutrient deficiency or during the early vegetative growth stage.

Second: During the pre-flowering stage to maximize reproductive potential.

Dosage: 250-500gm/ acre (0.5-1 gm/ L of water).

Crops: All Vegetables like Tomato, Capsicum, Brinjal, Cabbage, Okra, Cauliflower, Carrot, Potato, Chili, Cucumber etc.; all Fruit crops, Cereals, Pulses, Oil seeds and Ornamental crops.

Formulation: Powder

Available Packing: 100 Gm

Formulation: Powder

Available Packing: 1 Kg

SPARKLING

Sparkling provides elite protection against zinc deficiency, a critical micronutrient for cellular function. Its unique Zinc Sulphate Monohydrate concentration penetrates the plant to drive vigorous growth and significantly increase flower retention and yield.

Benefits: Enzyme activator, Vigour & vitality, Yield maximizer, Eco-safe choice, Advanced formula

Application Window

First: At the onset of growth or early vegetative stage.

Second: During the pre-flowering stage to maximize crop potential.

Dosage

Soil Application: 2 kg/ acre, Broadcast.

Drip or Flood Irrigation: 2 kg/ acre

Crops: Suitable for all crops.

Chemical Solutions

Formulation: Liquid

Available Packing: 1 Ltr

VITAAL

Vitaal provides elite protection against growth stagnation through its advanced Nitrate Urea technology. Its unique concentration penetrates the plant to drive vigorous growth and significantly increase vegetative yield.

Benefits: Advanced research formula, Vigour & vitality, Efficient nutrient delivery, Eco-safe choice

Application Window

First: At the onset of the early vegetative growth stage.

Second: During the mid-growth stage to maintain peak nutrient level

Dosage: 1 L/acre, Foliar Application.

Crops: Suitable for all crops

ZINOXSS

Zinoxss provides elite protection against growth-stunting zinc deficiencies. Its unique micronized formulation penetrates the plant tissues efficiently to drive vigorous growth and significantly increase flower retention and yield.

Benefits: Cost-effective suspension, Advanced formulation, Yield & vitality, Versatile delivery

Application Window

First: During the early vegetative growth stage to drive metabolic activity.

Second: During the pre-flowering or grain-filling stage to maximize yield potential.

Dosage: Foliar Application: 1-1.5ml / L of water; 0.5ml/L for grapes & 0.5-0.75 ml/L for onion & cotton

Crops: Suitable for all crops, especially paddy, maize, citrus, and vegetables.

Formulation: Liquid

Available Packing: 250 ML

Plant Protection

Biological Solutions

Formulation: Powder

**Available Packing:
250 Gm, 500 Gm & 1 Kg**

BeauverTM Biological Soil Amendment

Beauver is a high-performance, entomopathogenic fungal formulation designed for growers seeking a powerful, eco-friendly alternative to synthetic pesticides. Leveraging the natural predatory power of beneficial fungi, Beauver provides broad-spectrum control against whitefly, aphid, thrips, grasshoppers and certain beetles, without leaving harmful residues.

Benefits: Targeted pest control, Natural protection, Rapid integration, Enhanced plant safety, Environmentally Friendly

Application Window: **First:** At the onset of pest infestation or during the early vegetative stage as a protective measure | **Second:** Repeat 7-10 days later if pest pressure persists to ensure complete coverage of new growth.

Dosage: Soil application: 250gm/acre, Mix with 100 kg of FYM/compost & broadcast. Foliar/Drip application- 500gm/acre, Repeat at 7-10 days intervals, if pest pressure persists. Seed treatment- Mix 10-20 of Beauver with 50 ml of water & treat the 1 kg of seeds.

Recommended Crops: Paddy, Wheat, Maize, Pulses, Oil seeds, Cotton, Tomato, Chilly, Capsicum, Chillies, Cabbage, Cauliflower, Cucurbits, Beans, Pea, Cardamom, Apple, Grapes, Citrus, Mango, Guava, Papaya, Pomegranate, Cumin, Ginger, Tea and Plantation crops

Biological Solutions

Formulation: Powder

Available Packing: 100 Gm

BRAVO

Bravo is a powerful, all-natural bio-stimulant blend, featuring naturally derived plant extracts designed to fortify crops against specific pest pressures. It is formulated to improve the plant's natural resistance power against brown planthopper (BPH) and whiteflies, particularly in paddy, cotton and other Gramine family crops. It boosts natural immunity and strengthens plant structure for healthy, resilient growth.

Benefits: Targeted resistance, Gramineae specialist, Enhanced plant health, Vigorous development, Improved nutrient flow

Application Window

First: At the early vegetative growth phase to maximize foliage development and defence.

Second: During the peak growth or tillering stage when BPH and Whitefly risks are highest.

Dosage: Foliar application- 100gm/acre, repeat at 7-10 days intervals, if pest pressure persists.

Crops: BPH for paddy and whiteflies for cotton, tomato, brinjal, chili, soyabean and green gram.

BROADCAST

Broadcast is a high-potency Beauveria bassiana biological insecticide. Its concentrated spores penetrate the pest's cuticle, destroying internal tissues for rapid control. This eco-friendly agent effectively eliminates borers, caterpillars, grubs, mites, and thrips, restoring crop health naturally.

Benefits: Broad-spectrum control, Accelerated recovery, High organic quality, Enhanced Resilience, Natural defence

Application Window

First: At the field preparation or during the early vegetative phase.

Second: 7-10 days after the first application to ensure complete control.

Dosage: 4kg/acre, Broadcast.

Crops: Suitable for all crops.

Formulation: Granular

Available Packing: 4 Kg

Formulation: Liquid

**Available Packing:
60 MI & 120 MI**

CKINNGG

CKinngg is a premium botanical liquid featuring secondary metabolites of Allium sativum, Cinnamomum camphora, and Nicotiana tabacum. This synergistic formula eliminates sucking pests, thrips, and whiteflies while triggering internal plant defences. It promotes structural strength and rapid recovery from pest-induced stress for a healthier, more resilient crop.

Benefits: Protective power, Immune activation, Rapid recovery, High organic quality, Dual-action defence

Application Window

Apply at the first appearance of pests; repeat every 10-15 days if needed.

Dosage: 20ml/15L of water, Foliar application.

Recommended Crops: CKinngg is suitable for all crops such as cereals, Pulses, Oil seeds, Fruit, Vegetables, Plantation and Fiber crops etc.

Biological Solutions

Formulation: Liquid

Available Packing:
100 ML, 250 ML, 500 ML

CROBIA Biological Soil Amendment

Crobia is an advanced bacterial bio-fungicide designed to suppress soil-borne pathogens like Fusarium, Pythium, and Rhizoctonia. By producing potent siderophores and natural antibiotics, it eliminates harmful diseases while colonizing the soil and foliage. This high-performance formulation reduces disease severity, enhances plant growth, and significantly boosts overall yield.

Benefits: Disease suppression, Root zone protection, Improved plant vigour, Organic excellence

Application Window: **First:** At the time of sowing/transplanting or early vegetative stage. **Second:** 20-30 days after the first application to maintain a strong shield.

Dosage: 1L/acre, Foliar application | 1L/acre, Drip irrigation/ drenching.

Recommended Crops: Paddy, Wheat, Maize, Pulses, Oil seeds, Cotton, Tomato, Chilly, Capsicum, Chillies, Cabbage, Cauliflower, Cucurbits, Beans, Pea, Cardamom. Apple. Grapes, Citrus, Mango, Guava, Papaya, Pomegranate, Cumin, Ginger, Tea and Plantation crops.

DEADDLY

Deaddly is a high-performance, research-driven bio-shield engineered for maximum crop protection. By fusing botanical power with advanced science, it creates a total defence system against devastating leaf diseases and destructive pests. It delivers rapid control of red mites, whiteflies, aphids, thrips, and green pests, ensuring vibrant, high-yielding harvests.

Benefits: Broad-spectrum control, Larvicidal action, Maximizes vigour, Triggers Immunity, Disease management

Application Window

First: At the onset of infestation or as a preventative spray during the vegetative phase.

Second: 10-12 days after the first application to break the pest life cycle.

Dosage: 20ml/15L of water.

Crops: Grapes, Cotton, Groundnut, Soyabean, Onion, Chilly, Flowers and all vegetables & Fruits.

Formulation: Liquid

Available Packing: 100 ML

Formulation: Liquid

Available Packing: 100 ML

DELTA

Delta is a premium natural extract formulated for the prevention and cure of fungal diseases. It works at the molecular level, boosting isoenzyme and biological enzyme activity to strengthen plant immunity. Beyond protection, it enhances photosynthesis and optimizes growth, providing critical resilience against environmental stressors like drought and waterlogging.

Benefits: Complete fungal cure, Dual-action protection, Enzymatic activation, Photosynthetic efficiency, Abiotic stress guard, Yield quality

Application Window

First: At the onset of infestation or as a preventative spray during the vegetative phase.

Second: Repeat at 10-20 days via spray or DRONE to ensure total recovery.

Dosage: 250ml/acre

CROPS RECOMMENDED: Paddy, Chilli, Tomato, Potato, Mentha, Wheat, Peas, Cotton, Grapes, Vegetables, Pulses, other horticultural and flower crops.

Biological Solutions

Formulation: Liquid

Available Packing: 100 MI

MAHARAJ

Maharaj is an advance organic solution engineered to provide total immunity against all caterpillar species, including leaf folders, spodoptera, heliothids, shoot borers and fruit borers. Stops pests through cellular-level starvation and simultaneously drives crop vigour with a non-toxic, high-performance bio-shield.

Benefits: Broad-spectrum control, Cellular penetration, Anti-feedant action, Yield enhancement, Safe for all

Application Window

First: At the initial stage of pest infestation or as a preventive early vegetative stage.

Second: Repeat 10-15 days after the first spray to ensure control of late-hatching larvae.

Dosage: 1-1.25 ml/L, Foliar application, Repeat at 10-15days intervals.

Crops: Suitable for all crops

MINISTEER

Minister provides elite protection against a broad spectrum of sucking pests, including Aphids, Jassids, and Whiteflies. Its unique herbal concentration penetrates the plant to drive vigorous growth and significantly increase flower retention and yield. It is the natural choice for farmers seeking both protection and productivity in one bottle.

Benefits: Superior pest control, Yield maximizer, Vigour & vitality, Eco-safe choice, Advanced formula

Application Window

First: At the onset of pest infestation or during the early vegetative growth stage.

Second: During the pre-flowering stage to maximize reproductive potenti

Dosage: 20ml/15 L of water, Foliar application, when sucking pest attack seen.

Crops: Suitable for all crops.

Formulation: Liquid

Available Packing: 100 MI

Formulation: Liquid

Available Packing:
30 MI & 60 MI

QUEENN

Queenn is a high-performance, scientifically developed liquid formulation designed for superior crop protection. By combining potent microbial extracts with advanced enzymatic activators, it fortifies a plant's natural immunity while delivering aggressive, long-lasting control over devastating larval pests including spodoptera, heliothis, spotted boll worm, pink boll worm, and brinjal leaf-miner.

Benefits: Broad-spectrum larvicide, Systemic vigour, Comprehensive control, Residue-free, Long-duration protection

Application Window

First: At the initial stage of larval infestation.

Second: Repeat 12-15 days after the first application to break the pest life cycle.

Dosage: 10ml/15L of water, Foliar application, Repeat at 12-15 days intervals.

Crops: Suitable for all crops.

Biological Solutions

Formulation: Liquid

Available Packing:
100 ML

TORNADO

Tornado is a high-performance liquid formulation developed from a scientific blend of specialized plant extracts and biologically important microbes. This dual-power formula utilizes a complex array of secondary metabolites- including polyphenols, terpenoids, alkaloids, and essential oils- to provide immediate insecticidal and repellent action. Simultaneously, the microbial components boost plant enzymes to build a permanent immune shield against future attacks.

Benefits: Metabolite power, Targeted larvicidal action, Dual-action defence, Vigorous recovery, Sustainable farming

Application Window

First: At the onset of larval infestation or during early vegetative growth.

Second: Repeat 10-15 days after the first spray to break the pest's life cycle.

Dosage: 1ml/L, Foliar application, At the onset of larval infestation.

Crops: Suitable for all crops.

TRAPPER

Trapper represents a breakthrough in bio-technology, offering a specialized solution for high-value agricultural and horticultural crops. It is specifically formulated to target and eliminate the most stubborn agricultural pests, including red spider mites, leaf miner, and thrips, which often develop resistance to ordinary chemicals.

Benefits: Powerful mite control, Broad spectrum, Extended protection, Residue management, Vigour maintenance

Application Window

First: At the onset of infestation or during the peak vulnerability stage of the crop.

Second: Repeat 8-10 days after the first spray to target newly hatched nymphs.

Dosage: 20ml/15L of water, Foliar application.

Crops: Suitable for all crops.

Formulation: Liquid

Available Packing: 100 ML

Formulation: Powder

Available Packing:
250 Gm, 500 Gm

TrichobacTM Biological Soil Amendment

Trichobac is a potent biological solution optimized for soil health and fungal suppression. Powered by *Trichoderma harzianum*, it establishes a defensive microbial shield within the rhizosphere to neutralize soil-borne pathogens. It effectively manages pod, root, and red rot in field crops like groundnut and sugarcane, while eliminating wilt and damping-off in onions, tomato, brinjal and various vegetable seedlings.

Benefits: Broad-spectrum protection, Nursery safety, Growth promotion, Organic excellence, Aggressive bio-control

Application Window

First: During seed treatment, soil preparation, or at the time of transplanting

Second: 3-4 weeks after the first application to ensure the beneficial fungi remain dominant.

Dosage: Soil application-250gm/acre, Mix with 100kg soil/sand/FYM, Broadcast | Soil drenching/drip- 1kg/acre | Seed treatment- 5-10gm/kg of seeds, Dissolve in 50ml of water & apply | Nursery bed treatment- 50gm/ sq. meter of nursery bed.

Crops: Suitable for all crops.

Biological Solutions

Formulation: Liquid

Available Packing: 100 ML

WONDER+KILLER

Wonder is a high-performance, all-natural liquid formulation designed to protect leaf cells and fortify plant physiology. It features a unique botanical pungency that is naturally disliked by sucking pests. It provides a two-step approach to manage sucking pest: Wonder builds a fortified, healthy plant from the inside out, while Killer creates a physical trap to maximize the effectiveness of your pest control program.

Benefits: Cellular Shield, Synergistic Efficiency, Enhanced Vigor, Natural Resistance, Pest trapping action

Application Window

First: At the onset of pest infestation or during early vegetative growth.

Second: Repeat 10-15 days after the first spray to break the pest's life cycle.

Dosage: 1ml/L, Foliar application, At the onset of pest infestation

Crops: Suitable for all crops.

Plant Protection Chemical Solutions

CYPER

Chemical Composition: Cypermethrin a.i. (Min. purity 92%) 5.00% w/w, Aromatic Hydrocarbon solvent (like Aromax) Q.S. %, Emulsifier A (Blend of Cal. Salt of Alkyl benzene sulphonic acid & poly oxy ether of nonyl phenol 5.60% w/w, Emulsifier B Blend of Cal. Salt of Alkyl Benzene Sulphonic acid & Polyethoxoxy Propoxy ether of Fatty alcohol) 2.40% w/w, Chlorpyrifos a.i. Min. (purity 94%) 50.00% w/w, Total 100% w/w

Direction Of Use: Please read enclosed leaflet before use.

Precautions: 1. Keep away from foodstuffs, empty foodstuff containers and animals food. 2. Avoid contact with mouth, eyes and skin. 3. Avoid inhalation the spray mist. Spray in the direction of wind. 4. Wash thoroughly the contaminated clothes and parts of the body after spraying. 5. Do not smoke, drink, eat and chew anything while spraying. 6. Wear full protective clothing while mixing and spraying. **Antidote:** 1. Atropinize the patient immediately and maintain full atropinization by repeated doses of 2 to 4 mg. of atropine sulphate intravenously at 5 to 10 minutes interval. As much as 25 to 50 mg. of atropine may be required in a day. The need for further atropine administration is guided by the continuance of symptoms. Extent of salivation is a useful criterion for dose adjustment. 2. Dissolve 1-2 gm of 2 PAM in 10 ml distilled water and inject intravenously very slowly for 10- 15 minutes 3- Antihistamines may be given for allergic manifestation.

Recommendations: It is recommended to control Aphid, Jassid, Thrips, Whitefly, American bollworm, Spotted bollworm, Pink bollworm, Spodoptera litura of cotton and stem borer and leaf folder of paddy.

Formulation: Liquid

Available Packing : 100 ML, 250 ML, 500 ML & 1 Ltr

Formulation: Liquid

Available Packing: 50 Gm, 100 Gm, 250 Gm & 500 Gm

EMAME

Emamectin Benzoate 5% SG, Insecticide Emamectin Benzoate 5% SG is a water soluble granular formulation containing 5% active ingredient and is recommended for the control of Bollworms on cotton, fruit and shoot borer on okra, DBM on cabbage, fruit borer, thrips, mites on chilli, fruit and shoot borer on brinjal, pod borer on red gram and chickpea. It is an insecticide with stomach action and should be ingested by the larvae to be most effective. Affected larvae become paralyzed and stop feeding shortly after exposure to Emamectin Benzoate 5% SG and subsequently die after 2-4 days..

Chemical Composition: Emamectin Benzoate a.i. 5.00% w/w, Sodium N-methyl-N-oleoyl taurate 7.50% w/w, Sodium alkyl naphthalene sulfonate 1.00% w/w, Polydimethylsiloxane 0.10% w/w, Lactose anhydrous Q.S.% w/w, Total 100.000% w/w.

Chemical Solutions

Formulation: Granular

Available Packing: 4 Kg

HOPPER

Chemical Composition: Cartap hydrochloride Tech.(Based on 98% w/w a.i.) 4.10 % w/w, Isopropyl acid Phosphate 1.00% w/w, phosphoric acid (85%) 0.50% w/w, NP-85 or equivalent (Alkyl Aryl Sulphonate) Polyoxy ethylene nonyl phenyl ether 1.50 % w/w, China clay / Kaoline 5.00% w/w, Sand 87.90% w/w, Total: 100.00% w/w. Direction of Use: Please read enclosed leaflet before use. Precautions: 1. Keep away from foodstuffs, empty foodstuff containers and animals food. 2. Avoid contact with mouth, eyes and skin. 3. Avoid inhalation while using. 4. Wash thoroughly the contaminated clothes and parts of the body after broadcasting. 5. Do not smoke, drink, eat and chew anything while broadcasting. 6. Wear full protective clothing while broadcasting. Antidote: An intravenous injection of 100-200 mg of L-cysteine or an intramuscular injection of 20-60 mg. of BAL (dimercaprol or 2,3 dimercaptopropanol) are recommended.

Apply steroids against dermatitis. First Aid : Please see enclosed label. Symptoms: Please see enclosed label. Recommendation: It is recommended to control steam borer, leaf folder and whorl maggot of rice crop.

PROFFEN

PROFENOFOS 40% + CYPERMETHRIN 4% E.C.

Chemical Composition:

Profenofos a.i.....	40.00% m/m,
Cypermethrin a.i.....	4.00% m/m.
Castor oil polyglycol ether 36-40...	9.75% m/m,
Dodecyl benzene sulphonic acid Ca salt...	5.25% m/m,
Soyabean oil epoxidised	1.00% m/m.
Solven CIX...	Q.S..
Total...	100.00% m/m.

Recommendation: it is recommended to control Bollworms, complex of cotton crops.

Formulation: Liquid

Available Packing: 100 ML, 250 ML, 500 ML & 1 Ltr

Formulation: Liquid

Available Packing: 250 ML, 500 ML & 1 Ltr

PHOSATE

Chemical Composition: 1. Isopropyl amine salt of Glyphosate a.i 40.60% w/w, 2. Manufacturing Impurities 4.00% w/w 3. Water Q.S. % w/w, 4. Surfactant Inert Poly oxy ethylene amine 15.00% w/w Total 100% w/w

Direction Of Use : Please read enclosed leaflet before use. Precautions: 1. Keep away from foodstuffs, empty foodstuff containers and animals food. 2. Avoid contact with mouth, eyes and skin. 3. Avoid inhalation the spray mist. Spray in the direction of wind. 4. Wash thoroughly the contaminated clothes and parts of the body after spraying. 5. Do not drink, eat and chew anything while spraying. 6. Wear full protective clothing while mixing and spraying.

Antidote: No Specific antidote is known. Treat symptomatically.

First Aid: Please see enclosed Leaflet. Symptoms: Please see enclosed Leaflet.

Recommendations: It is used to control of weeds of tea and non crop areas.

Chemical Solutions

Formulation: Granular

Available Packing:
100 Gm & 500 Gm

SOLITAAR

AMMONIUM SALT OF GLYPHOSATE 71% S.G.

(Systemic Herbicide)

Chemical Composition:

Ammonium Salt of Glyphosate a.i. (insitu) (Based on 100% purity)	71.00% w/w
Inert Polyoxyethylene Amine Surfactant	12.50%w/w
Moisture	1.00% w/w
Ammonium sulphate	QS % w/w
Total:	100.000% w/w

SUCKER

Chemical Composition:

Fipronil a.i.	40.00% w/w
Imidacloprid a.i.	40.00% w/w
Sodium polycarboxylate	3.00% w/
Sodium Dioctyl sulfosuccinate 85%	2.00% w/w
Non ionic aque-ous emulsion of (30%) polydimethylsiloxane	0.30% w/w
Sodium lignosulfonate sulfomethylated	QS%
Total:	100.000% w/w

Recommendations: Fipronil 40% + Imidacloprid 40% WG is recommended for control of white grubs in sugarcane.

Formulation: Liquid

Available Packing:
50 Gm & 100 Gm

Formulation: Liquid

Available Packing:
50 Gm, 100 Gm & 250 Gm

TALAXY

Chemical Composition: 1. Matalaxyl a.i. 8.00% w/w, 2. Mancozeb a.i 64.00% w/w, 3. Dispersing Agent: Condensate of Formaldehyde & naphelene Phenol sulfonic acid sodium salt or equiv. 1.40% w/w, 4. Wetting Agent: Stearyl benzimidazole disulphonic acid sodium salt or equivalent 0.60% w/w, 5. Carriers: Silica acid 0.60% w/w, 6. Kaolin QS % w/w. Total 100% w/w **Direction Of Use:** Read attached leaflet before use. **Precautions:** Do not use cooking utensils for preparing spray. Use stick for stirring the spray solution. Wear hand gloves to avoid contact with the skin. Also avoid inhalation and contact with eye. Wear protective clothing, mask, goggles, boots while spraying and do not expose yourself to spray drift. Do not blow nozzles with mouth. Do not eat, drink or smoke while handling or applying the product. Do not store unused spray solution. Clean sprayer, buckets and other utensils with water daily after use. Wash hand with soap and plenty of water and change clothes after the work is over. Also wash the contaminated clothes. Do not contaminate streams, ponds, waterways etc. by discharging leftover spray materials into them or by cleaning sprayers, contaminated buckets etc. in them. Do not use spray when bees are active. When used at recommended dosages, no adverse effect on wild life is expected. In case of any sign of poisoning, immediately consult the doctor.

Recommendations: For the control of downy mildew of grapevine, damping off, leaf blight and black shank disease in tobacco in nursery, late blight in potato, white rust and Alternaria blight in mustard, Pytophthora foot rot in black peper and downy mildew in pearl millet.

Manufactured and Marketed by:

AGRARIAN CROP SCIENCE PRIVATE LIMITED
